REPORT OF SCHOOL PHYSICIAN

To Mr. Vincent Gatto, Superintendent of Schools.

The following is a report of the health work from May 1937 to May 1938.

Number pupils examined	192
Number underweight 10%	15
Number defective vision	36
Number defective hearing	6
Number anemia	75
Number cardiac disease	3
Number Pulmonary disease	1
Number defective teeth	112
Number diseased tonsils	34
Number defective breathing	50
Number enlarged glands	121
Number defective speech	3
Number pediculosis (nits)	1
Corrections	
Number diseased tonsils	6
Number defective vision	4
Number under treatment, cardiac dis.	2
Number under treatment, teeth	56
Number under treatment, tonsils	6
Number under treatment, breathing	2

All pupils are vaccinated and most all have been immunized to diphtheria.

Reference Vision—Most all the children who need glasses have them. There are 6 who need them badly and the parents of these should be able to get them. Many who are reported above have glasses but have errors of refraction that cannot be corrected.

Many of the children are anemic due to various causes, i.e.: carious teeth, diseased tonsils and adenoids and many should be classed as nutritional anemia. There are 2 cases of organic heart disease and both have had medical attention. The other is functional.

Of the 112 cases of defective teeth several have only 1 or 2 cavities and could be omitted from the statistics.

There are 85 with some degree of caries of the permanent teeth and 27 the temporary.

Posture—Only those classed as poor are reported. The rest of the pupils are fair and a very few are normal.

Tonsils and adenoids of the 34 reported—8 are in bad condition and appointments for operation have been made for some of them. I think most of these 8 will be operated this summer. The balance, 26, are cases in which operation is optional. Many of these would be benefited however.

Defective breathing—Only 2 or 3 have much difficulty in breathing and 2 have been under treatment by a specialist. The glands go along with nutritional anemia, poor teeth and tonsils and none of these are serious. 17 had wax in their ears. One was treated during the year.

Dr. Robert Kerr had a clinic June 3rd, 1938, and 20 underweights were examined and a patch test done on most of them. He comes once a year to examine the underweights. There were 2 cases of Scarlet Fever during the school year and the North Branch school was closed for about 2 weeks. There were also several cases of measles.

On the whole the school year has been comparatively healthy in regard to children's diseases.

G. D. TIBBETTS, M.D.
